East Bay Science Day Trip – Itinerary

*Please advise of any Special Needs for your child on the Registration Form. Each student must bring a **“bagged lunch” and an afternoon snack.***

This 8-hour day trip begins by taking students to Oakland's famed Chabot Space & Science Center – featuring the NASA Experience – a NASA Ames Visitor Center, with hands-on activities and NASA AMES artifacts, that highlight current Ames' research and space missions, planetarium shows, and the research-level observatory complex with three large scale telescopes; which is the largest observatory complex free for public viewing in the Western United States.

At 11:30 students load the buses for lunch en route to the Oakland Zoo which features animals from the African Savanna, Tropical Rainforest, Wild Australia, Parrot Plaza, and a gondola ride to the California Trail.

Monroe Science Educational Services (MSES) enjoys serving the community with an emphasis on bringing "real-world" science topics, processes, and scientific applications to students and families. We offer a variety of indoor and outdoor programs and student/teacher workshops geared towards National and California State Science Standards.

MSES has worked to secure the lowest possible rate for this trip; which is 60% less than most day care!

Bus Itinerary:

- 8:00AM** - Meet at Foothill Middle School
- 8:30AM** - Bus Leaves
- 9:30AM - 11:30AM** - Chabot Space & Science Center
- 11:30AM - 12:00PM** - Lunch en route
- 12:00PM - 3:00PM** - Oakland Zoo
- 4:00PM** - Arrive at Foothill Middle School

Cost Includes:

- 8-hour Educational Day Trip
- Private Charter Bus Transportation
- Chabot Space & Science Center Admission
- Oakland Zoo Admission
